

Jayanta Nath

SENIOR FULL STACK DEVELOPER & TECHNICAL LEAD

Professional Profile

Accomplished Senior Full-Stack Developer and Technical Lead with 19+ years of experience architecting, developing and delivering enterprise-grade, cloud-native solutions. Combines deep hands-on expertise in coding and system design with a proven track record of leading cross-functional teams. Specializes in transforming complex business requirements into scalable, high-performance applications for the Automotive, Banking, and Telecommunications sectors.

Key Highlights

- Proven track record of delivering mission-critical projects for a global client portfolio, including **Volvo Cars (Sweden)**, **T-Mobile (USA)**, **Citi Bank (Singapore)**, and **Vestas (Denmark)**,
- Deep full-stack expertise, architecting solutions from front-end (**Angular**, **React**) and back-end (**.NET**, **Microservices**) to the data layer (**SQL Server**, **Cosmos DB**, **Snowflake**, **PostgreSQL**).
- Demonstrated success in building and implementing cloud-based solutions on **Microsoft Azure**, including **Databricks**, **Function Apps**, **Logic Apps**, **CI/CD pipelines**, and monitoring with **App Insights** and **Log Analytics**.

Technical Competencies

Software Engineering & Architecture

- Languages:** C#, TypeScript, JavaScript, Python
- Platforms & Frameworks:** .NET Core, .NET 6/8, Angular, React, Remix
- Architectural Styles:** Microservices, REST APIs, GraphQL, Event-Driven Design, Cloud-Native Development
- Methods:** Agile/Scrum, CI/CD, Infrastructure as Code (IaC)

Cloud & DevOps Engineering

- Cloud Platform:** Microsoft Azure
- DevOps & CI/CD:** Azure DevOps(Pipelines, Repos), GitHub Actions, SonarQube
- Infrastructure as Code (IaC):** Bicep, Azure PowerShell
- Containers & Orchestration:** Docker
- Monitoring & Observability:** Azure App Insights, Log Analytics
- Serverless & Integration:** Azure Function Apps, Logic Apps, Event Grid, Service Bus

Data & Databases

- SQL Databases:** SQL Server, PostgreSQL, Oracle, Snowflake
- NoSQL Databases:** Azure Cosmos DB, HBase
- Data Access:** Entity Framework, Dapper, LINQ
- Big Data Tools:** HDFS, Hive, Databricks

Address

LGH 1202, Pilegården 7D, Askim,
43635, Gothenburg, Sweden
+46 768700031
jayanta.nath@hotmail.com

Nationality

Swedish

Linked-In Profile

www.linkedin.com/in/jayanta-nath

Skills

C#

.Net Core, .NET 6/8, Entity Framework

Microservice, Rest API, GraphQL

Angular, Type Script, Java Script

HTML, CSS, XML, JSON

SQL Server / Cosmos DB/
Snowflake/ PostgreSQL / Oracle

Azure CI/CD, DevOps, IaC with Bicep

MS Azure, Docker, Oracle Cloud

MS Visual Studio, VS Code, Github

SonarQube, ReSharper

Agile Development

Domain

Automotive

Finance, Banking & Insurance

Telecommunication

Hobbies

- Exploring new technologies
- Traveling to historical places
- Playing Football, Cricket & Tennis
- Fitness training (gym)

Professional Experience

SENIOR SOFTWARE ENGINEER | Volvo Car Corporation

Gothenburg, Sweden | October 2024 – Present

- Design, develop, and maintain core components for Volvo's next-generation digital platforms using a modern stack including C#, .NET, Angular, React, Remix, SQL Server, Cosmos DB, Snowflake and Azure services.
- Collaborate within cross-functional Agile teams to engineer software solutions that enhance vehicle energy efficiency and support Volvo's sustainability objectives.
- Lead the migration from a monolithic legacy system to a cloud-native microservices architecture on Azure, achieving a 50% improvement in system scalability and resilience.

SENIOR TECHNICAL LEAD | HCL Technologies Sweden AB

Gothenburg, Sweden | November 2013 – October 2024

- Led the end-to-end design and development of a microservices-based platform for major clients including **Volvo, T-Mobile, and Citi Bank**, utilizing **C#, .NET 6, and Angular**.
- Engineered and implemented **Azure CI/CD pipelines**, automating testing and deployment to **reduce release cycles by 30%** and significantly improve deployment reliability.
- Mentored and coached junior and mid-level developers on coding best practices, design patterns, and performance optimization, enhancing overall team velocity and code quality.
- Collaborated directly with client stakeholders in Sweden to translate business requirements into technical specifications and agile user stories.

IT ENGINEER | TATA Consultancy Services (previously CMC Ltd.)

Kolkata, India | April 2010 – November 2013

- Developed and maintained full-stack web applications for banking and insurance clients using ASP.NET, SQL Server, and JavaScript.
- Optimized complex SQL queries and database structures, improving application response times by 25% for high-transaction systems.
- Implemented RESTful web services to integrate with third-party systems, expanding application functionality and data exchange capabilities.

SOFTWARE ENGINEER | Fortuna Impex Pte. Limited

Kolkata, India | July 2008 – March 2010

- Contributed to the development of an internal ERP system, focusing on inventory and supply chain modules using C# and WinForms.
- Authored unit tests and participated in code reviews, helping to identify and resolve critical bugs before production deployment.

JUNIOR SOFTWARE DEVELOPER | Venus Software

Kolkata, India | January 2007 – July 2008

- Supported the development team in building client websites and web applications using HTML, CSS, and ASP.NET.
- Gained foundational experience in the software development lifecycle, debugging, and version control with TFS.

Current Projects

WLTP REDA (Compliance Platform) | Volvo Cars | October 2016 – Present

- Architected and developed a critical microservices-based platform that calculates fuel consumption and CO₂ values for every saleable vehicle, ensuring global regulatory compliance.
- Led the end-to-end delivery of multiple modules (Weight, Tyre, Aerodynamics), from requirements to production, using **C#, .NET 6/8, Angular, and Azure data services (SQL, Cosmos DB, Snowflake)**.

Strategic CO2 Monitoring Tool (SCMT) | Volvo Cars | Jun 2022 – Present

- Spearheaded the development of a digital solution that serves as the single source of truth for CO₂ data, reducing human error and providing accurate fleet CO₂ predictions.
- Designed algorithms to intelligently handle missing data and built the application using **React, Node.js, Azure Functions, Logic Apps, Databricks**.

Battery Variant Management (BVM) | Volvo Cars | Oct 2024 – Present

- Developing a new application within the WLTP ecosystem to manage battery variants, supporting Volvo's electrification strategy using **.NET, Remix, TypeScript, PostgreSQL, and Docker**.

Hackathon Project: 'Code Golf' Portal | Volvo Cars | 2022

- Awarded 'People's Choice Award' for developing an innovative code challenge portal during an internal hackathon using **React, Node.js**.

Other Key Projects

Component Inspection Reporting System | Vestas, Denmark | June - Sep 2016

- Senior Developer for a reporting system, responsible for GUI design, backend API development, and database architecture using **C#, jQuery, .NET 4.5, SQL Server, WCF Service, Microsoft Azure**

Integrated Data Warehouse (IDW) | T-Mobile, USA | July 2015 – May 2016

- Team Lead & Business Analyst for a large-scale data warehouse project. Directed requirement analysis and designed the technical solution using **Scala, Hadoop ecosystem (HDFS, HBase, Hive, Pig, Oozie)**

FTU Document Tracking System | Citi Bank, Singapore | Nov 2013 – June 2015

- Senior Developer for a bank-wide document tracking system, managing implementation, testing, and production support using **C#, .NET 3.5, SQL Server, WCF**.

GENISYS Configurator | HDFC-ERGO, India | April 2010 – November 2013

ETimePro | Ministry of Home Affairs (Delhi), India | July 2008 – March 2010

BusinessEasy | RB Horticulture, India | January 2007 – July 2008

Education & Certifications

- **Bachelor of Technology in IT** | July 2006 | West Bengal University of Technology, Kolkata, India.
- **Certified Oracle Cloud Architect Associate** (July 2023)
- **Accelerated ANIIT for Engineers Course** | NIIT, India (2008)
